

# Environmental Policy

## Ro-Dor Limited

Ro-Dor Limited is committed to achieving high standards of environmental quality as well as providing a safe and healthy working environment for its employees, visitors to site and the public in general. We aim to comply with all applicable regulatory requirements.

We have an established Health & Safety Policy and regularly review its effectiveness. We also have an appointed person responsible for Health & Safety who monitors current and planned legislation and other considerations.

Ro-Dor train and educate our staff on environmental issues that may affect their work and strive to ensure they have an understanding of environmental practices in place, and what measures are required to control them.

We will strive to be effective in pollution control by reduction and re-use, and/or recycling. We will ensure that any waste produced is properly disposed of in a safe and environmentally friendly manner.

We will continue to strive to achieve higher quality in our products and service, whilst maintaining an ethical policy regarding the environment. Our objectives are to help ensure a better future for our employees and customers alike by promoting a positive attitude towards the protection of the environment.

A handwritten signature in black ink, appearing to read "Nick Gregory", written in a cursive style.

**Nick Gregory**
